MechCrane consists of a large range of flexible cranes for pillar or wall mounting.

The cranes can benefit from a wide range of hoisting equipment. With capacities up to 250 kg and standardized operating ranges up to 5 meters the possibility of adjusting the cranes to suit requirements and environment increases.

Easy to order with the catalogue at hand  
Technical assistance available if necessary

The crane tracks are based upon the rail profiles within our rail system program - **MechRail**.

This entail a wide range of optional products as the shape of the profiles makes it possible to mount nearly any other equipment. Our own chain hoist **MechChain** - particularly produced for the system placed in a trolley - is available as an integrated variant in crane types VKL-H & VKA-H.

Our knowledge and experience in handling secure cranes that offer good...

...efficiency

...economy

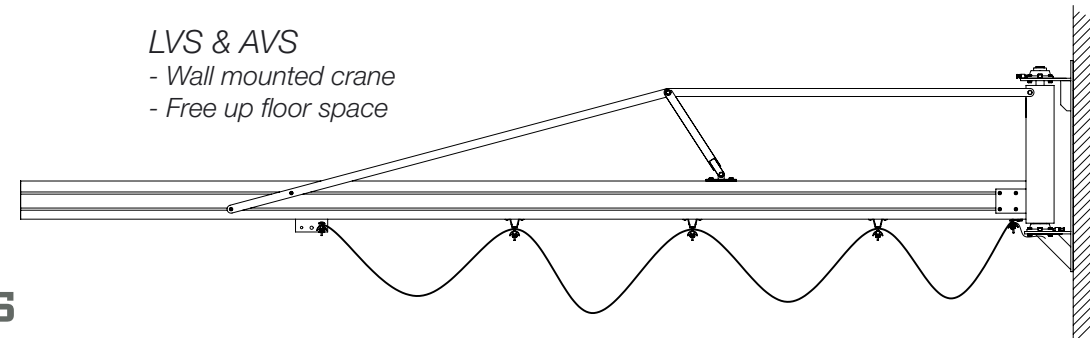

...ergonomics

"We design your optimum technical solution to give you the best overall economy"

Several different types of cranes makes the installation in your facility simple...

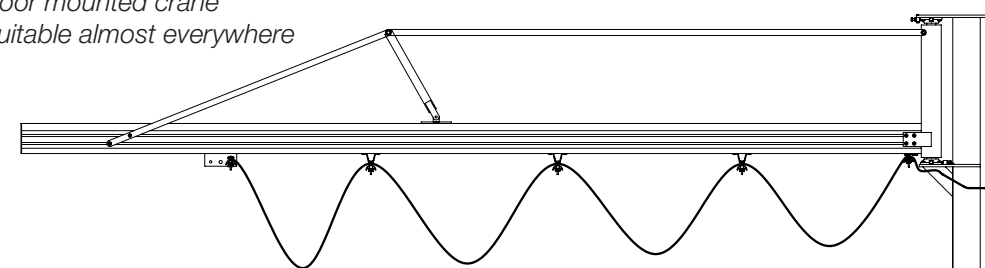

LVS & AVS

- Wall mounted crane
- Free up floor space

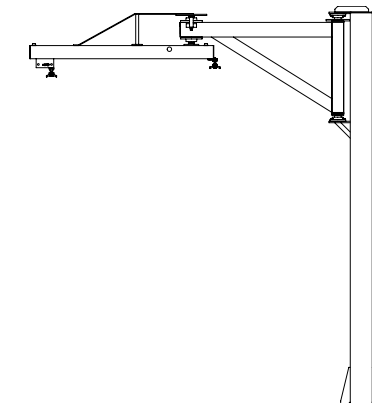

LPS & APS

- Floor mounted crane
- Suitable almost everywhere

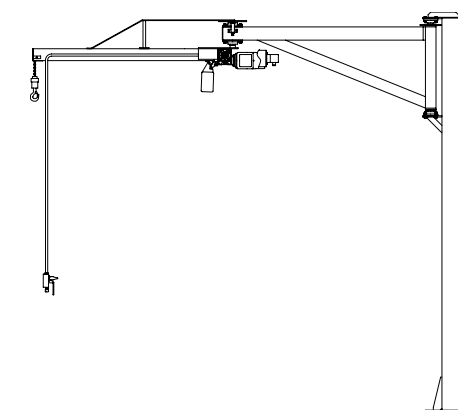

VKL & VKA

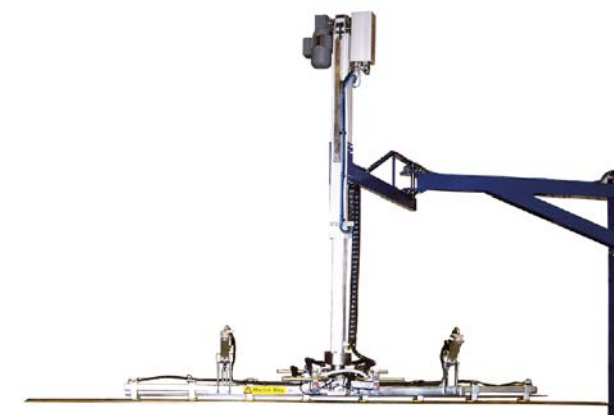

- Floor mounted knuckle boom crane
- For large working ranges

- Available with integrated hoist  
VKL-H & VKA-H

LVS with MechChain

We often build special cranes, here a floor mounted crane with a MechLift - by choice an electrically or pneumatically driven hoist

Find your crane and choose among a variety of optional products as required:

Air preparation

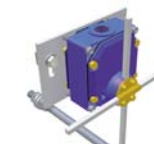

Brakes

Cable trolleys

Cable & hose

Limit switches

VKL-H
